It is suggested a **From Handicap** of at least **+5** be set to account for ultra-low GA handicap players.

**To Handicap** should be set at **45** for men and **54** for women, i.e. +9.

*Note: - this is to allow daily handicap slope rating system calculations to occur in the background, men and women will still play off their respective maximum "Daily Handicaps" of 36 and 45 respectively.*
